Headquarters: USA

Industry: Booking Service

Renting Boats App: Make Boats Booking Easy

Psychometrics helps organizations to effectively assess, select, and develop their personnel and provide insights about behaviour, personality, cognitive ability, leadership potential, and more.

BUSINESS CHALLENGES

The application is aimed to provide a service of lending and renting of boats (similar to Airbnb). Mobile applications should be development only for users who want to rent a boat. Boat owners and the service admins have a web-based application.

SUMATOSOFT

Building Future of IT Today

OUR SOLUTION

Together with the client, we analyzed the business goals and requirements and decided on the scope for MVP version of the application.

We developed a custom design for iOS and Android applications, developed basic functionality and released an MVP version of the application with the featured listed below.

DISTINCTIVE FEATURES

- Detailed search for boats
- Multi Language support (English and Spanish)
- Users rating
- Preset email notifications
- General reports in Admin panel
- Users management by Admins
- Extended bookings management in Admin panel

WHAT'S NOW

The application is being developed and tested.
